OPIOID TREATMENT PROGRAM

Medication-Assisted Treatment: Choices for a Healthy Lifestyle

Samaritan Daytop Village offers patients holistic, medication-assisted treatment for opioid addiction at its Opioid Treatment Program.

Using evidence-based treatment and behavioral interventions, we help patients lay the groundwork for recovery from addiction to opioids.

The Opioid Treatment Program relies on medication-assisted treatment – utilizing Methadone or Suboxone – to transition patients into recovery and reclaim active and meaningful lives again. Research has shown that these safe, effective medications reduce the cravings and withdrawal symptoms commonly associated with opioid addiction.

For the best outcomes, patients should participate in a comprehensive medication-assisted treatment program that includes counseling (through in-person or telehealth sessions), social support services, and clinically prescribed medications.

Our dedicated staff works with each patient to help them manage their addiction, develop healthy, supportive

relationships and live a balanced lifestyle. The team provides patients with the ability to integrate treatment into their daily routines at work and at home.

Opioid Treatment is the right choice if you:

- Have a serious heroin, fentanyl, morphine, or other opiate addiction
- Tried to detox and have been unable to stay drug free
- Are ready to reconnect with your family and loved ones

Samaritan Daytop Village operates two Opioid Treatment Programs in the Bronx. Both are licensed by the New York State Office of Addiction Services and Supports (OASAS), registered by the U.S. Drug Enforcement Administration, certified by SAMHSA Center for Substance Abuse Treatment, and accredited by the Joint Commission.
